## Continuation Sheet (PTOL-303)

Application No.

Continuation of 3. NOTE: The new claims are directed to a different invention of different scope than that of claims 22-26 which were finally rejected. Claims 22-26 were directed to determining the order in which a plurality of pipettes would sample and analyze a solution from a single bottle based on an avoiding leviel of carry over of each of the pipettes. The new claims are directed to method of sampling two solutions in respective bottles wherein each bottle is sampled by a respective pipette. While the claim states the first pipette has an equal to or higher avoiding level of carry over than the second pipette, the claim does not the express that the order in which samples are taken up is based on such criteria. Furthermore, the previous clams required a higher avoiding level not an equal to or higher than. The claims were previously search based on the interpretation as state in the prior office action and stated above. The newly drafted claims is a new and different invention. The new claims may be new matter. If applicant believes the claims are not new matter, applicant is invited to point out specically where in the specification the claims are supported. Furthermore, in order to pursue the new invention a new application (excluding an RCE) must be filed. There were 5 claims were previously finally rejected and canceled and applicant submitted 6 new claims in the after final amendment..
